PLENARY SPEAKERS

Darcy Gruttadaro

Director of Public Policy

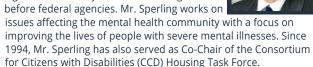

Darcy Gruttadaro leads NAMI's strategic initiatives to expand access to effective mental health services and supports for people impacted by mental health conditions. Ms. Gruttadaro has extensive experience in

advocacy, policy and programmatic approaches to improving the lives of youth and young adults impacted by mental health conditions. She has focused her work on expanding evidence-based practices, improving early intervention and building a broader array of available services and supports that promote resiliency and recovery.

Andrew Sperling

Director of Federal Legislative Advocacy, NAMI
Andrew Sperling is the Director of Federal
Legislative Advocacy for NAMI, the National
Alliance on Mental Illness. He leads NAMI's
legislative advocacy initiatives in Congress and

David Fleming

President and CEO of Donate Life America
"My best business decision has been to make
time to invest deeply in relationships with
business partners and advisers. Over the
years, it has been these relationships that
have been at the core of many personal and
organizational successes. When you wonder

what you should invest in, invest in people." David serves as the president and CEO of Donate Life America, since 1998. He attended the College of William & Mary, B.B.A. in accounting, minor in religious studies, in 1990.

Dr. Deborah Mash

Professor of Neurology and Molecular and Cellular Pharmacology

Dr. Deborah Mash is a neuroscientist, lecturer, and inventor that has dedicated more than 25 years of her research career to unlocking the secrets of the human brain.

Nationally recognized as a leading researcher in neuroscience and brain disorders, she has played a pivotal role in more than 200 published studies investigating aging, neurodegenerative and neuropsychiatric diseases. Dr. Mash graduated cum Laude from Florida State University, receiving her PhD in pharmacology from the University of Miami. She completed a postdoctoral fellowship in neurology at Beth Israel Hospital, Harvard Medical School. Dr. Mash continues to support her community by educating the public about the next biological frontier– the human brain.
